

PRESS RELEASE

New \$89 Heavy-Duty 12-Volt Game Feeder Kits

SAN ANTONIO, TX. This season there's an affordable heavy-duty feeder kit on the market and it's by the trusted brand of Texas Hunter Products. At just \$89, this kit is the most affordable heavy-duty 12-volt game feeder kit on the market. "When you compare the features and low \$89 price of the Texas Hunter Kits with those of our competitors, it's hard to justify spending money on anything else" says Bob Brock, Texas Hunter's President. "We have listened carefully to what hunters really want and need in the field and have delivered those features and more," he added.

TH70. Battery sold separately

The most notable qualities include a large, rugged steel housing – not plastic – with a baked-on powder-coated finish that includes heavy-duty steel mounting brackets for easy installation on practically any container. A durable high-torque 12-volt motor and Texas Hunter's easy-to-set EZ Set Digital Timer that carries a 5-Year Limited Warranty compliment the other impressive features. Also included is a stainless steel spinner plate with built-in gate stops that hold the feed in place between feedings, a large metal cone for the bottom of the feed hopper and a quick-connect plug that makes it easy to connect an optional solar charger.

And if you've ever been out in the field on a cold winter morning setting your timer in the dark...and dropped the wing-nut or the door panel...you'll appreciate the innovative captive screw latch and lift-and stay door that remains attached to the feeder – eliminating both of these irritating problems that have faced hunters for many years. And, this unit makes checking your battery level a snap, because the EZ Set Timer has a built-in battery tester along with a charging indicator for the optional solar charger.

"We design our products to save customers time, frustration and money in the long-run" says Brock whose company has been in operation for more than 50 years. "We spend a lot of time engineering these products and it's great to know that hunters find Texas Hunter's feeders to be the best they ever purchased, and the longest lasting," he added.
